1. Use **High Octane Champion Drive Topdress** as needed to enhance muscle (1/2 to 1 lbs/day)
2. Use **High Octane Power Fuel** as needed to enhance cover and muscle, and improve overall health (1/2 to 1 lbs/day).
3. Use **High Octane Fitter 35** as needed to enhance muscle and leanness (1 to 2 lbs/day). For limiting weight gain and improving muscle and leanness, feed 3 lbs per day as the sole diet.
4. Growth performance can vary depending upon genetics, environment, management, facilities, and immune status. The above figures are estimates only and do not reflect a guarantee of performance.
5. Consider lowering protein and increasing energy when muscle becomes too extreme, body condition is too lean, or the pig has structural issues.
6. If help is needed with rib shape, add 8 oz per day of **High Octane Depth Charge** to regular feed. **Depth Charge** can be used to keep pigs full when being limit fed as well.
7. Add **High Octane Showpig Paylean Premix** at the 4.5 to 9 grams/ton level during the final 45 – 90 lbs of weight gain for faster growth and added muscle development.
8. Deworm pigs thoroughly and effectively about every 30 to 45 days throughout the growing season.
